

PROFESSIONAL SUMMARY

Senior full-stack web developer with 4.5+ years of contracted experience at TF-Téléconception, complemented by freelance web development since 2017. Specialized in Symfony/PHP platforms, REST API design, authentication and role-based access control, and SQL performance optimization, alongside hands-on UI/UX and responsive frontend work. Most recent project: a full platform rebuild on Node.js with an admin dashboard and email automation, deployed to AWS.

PROJECTS DELIVERED

PROFESSIONAL EXPERIENCE

Senior Full-Stack Web Developer & Designer

TF-Téléconception

2022 - Present | Jendouba, Tunisia

- Design and deliver Symfony/PHP web platforms from data model through production deployment, applying clean-code practices that reduced technical debt and simplified long-term maintenance.
- Built and maintain 7+ REST APIs, reducing response times by up to 35%.
- Implemented authentication and role-based access control (RBAC) for 80+ enterprise users.
- Optimized SQL/MySQL queries and restructured databases, improving load times and system reliability by up to 30%.
- Redesigned responsive UI/UX in Figma; client-reported adoption improved by 25%.

Freelance Full-Stack Web Developer & Designer

Independent

2017 - Present | Remote (Tunisia)

- Deliver end-to-end web solutions for small businesses, including custom e-commerce and portfolio sites.
- Own the full cycle: requirements gathering, UML modeling, PHP/Symfony backend development, database design, and deployment.
- Designed and deployed responsive interfaces across 100+ client projects.

Teaching Assistant

Polyhydrons Complexe Technologique

2017 - 2018 | Jendouba, Tunisia

- Supported the lead instructor for 30+ students in PHP programming, UML design, and frontend development.

SELECTED PROJECTS

SecureIVAI – AI Consulting & Security Platform

Full-stack rebuild + brand identity redesign

- Rebuilt the platform end-to-end for an AI consulting and security company serving SMBs: Node.js backend, admin dashboard and email automation, deployed on AWS.
- Delivered the accompanying brand identity: new logo system and design system.

EVAPI Commercial Web Projects

Maximoferta, Nobis 51, House Barber, DRT Prestige, Curatech, Construction Harant, and others

- Custom UI/UX and responsive frontend with backend integration across commercial sites in multiple industries, built on a Symfony-based template.
 - Delivered booking, catalog, service-management and project-management features, with performance optimization and debugging.
-

Machine-Learning Recommendation Engine

E-commerce platform

- Built a machine-learning recommendation engine into an e-commerce platform used by 200+ farmers across Tunisia to sell their products.
-

E-Learning Platform Prototype

University faculty

- Full-stack prototype modeled in UML, covering course delivery, assignment tracking and student-faculty interaction.
-

TECHNICAL SKILLS

Languages

PHP, JavaScript, Python, SQL

Backend

Symfony, Laravel, Node.js, REST APIs

Frontend

React, jQuery, HTML, CSS, SCSS, TailwindCSS, Bootstrap, Twig, Vite

Databases

MySQL, PostgreSQL, SQLite

Design

Figma, Adobe Illustrator, UI/UX, wireframing, prototyping

Cloud & Tools

AWS, Git/GitHub, UML, phpMyAdmin, pgAdmin, HeidiSQL, LaTeX

CORE STRENGTHS

- ✓ Symfony/PHP platform architecture
 - ✓ REST API design & integration
 - ✓ Authentication & role-based access control
 - ✓ Database & backend performance tuning
 - ✓ Responsive UI/UX implementation
 - ✓ SEO & Core Web Vitals optimization
 - ✓ Legacy code & template debugging
-

EDUCATION

Master's Degree in E-Commerce

FSJEG Jendouba | 2018 - 2021

Bachelor in IT Applied to Management

FSJEG Jendouba | 2015 - 2018

CERTIFICATIONS

- ✓ Web development: PHP – MySQL
- ✓ Database administration
- ✓ UML design
- ✓ Project management
